## Local Employment Dynamics

Local Employment Dynamics (LED) is a partnership between the Illinois Department of Employment Security and the U.S. Census Bureau to develop information about local workforce and labor market conditions. This information is built from sources that cover more than 90% of total wage and salary civilian jobs, primarily state and federal administrative records. Exclusions to this coverage include federal government workers, agricultural workers, domestic workers, and the self-employed. The identities of individuals and businesses are protected against disclosure in accord with strict state and federal requirements.

### QWI Online

<http://imidev/LED/qwi.htm>

QWI Online provides eight key economic Quarterly Workforce Indicators (QWIs):

- Employment
- Changes in employment (net job flows)
- Job creation
- New hires
- Separations
- Turnover
- Average monthly earnings
- Average new hire earnings

These can be queried by:

- Geography: county, metropolitan area, or workforce investment area
- Industry (2, 3, or 4 digit NAICS)
- Gender
- Age group
- Ownership (all or private sector only)

### Industry Focus

[http://imidev/LED/industry\\_focus/default.htm](http://imidev/LED/industry_focus/default.htm)

What are the top industries in your county, metropolitan area, or Workforce Investment Area? What are the attributes of workers in those industries? **Industry Focus** reports the top industries by providing eight quarterly workforce indicators:

- Growth in employment
- Growth in hiring
- Number of new hires
- Firm job change
- Average monthly earnings for all workers
- Average monthly earnings for new hires
- Growth in average monthly earnings for all workers

### OnTheMap

[http://imidev/led/on\\_the\\_map/default.htm](http://imidev/led/on_the_map/default.htm)

OnTheMap is a web-based mapping and reporting application that shows where workers are employed and where they live. It enables creation, viewing, printing and downloading of workforce related maps, profiles, and underlying data. OnTheMap provides reports of age, earnings, and industry distributions. It is a unique resource for mapping the travel patterns of workers and identifying workforce characteristics of areas as small as a Census Block Group.

The capabilities of OnTheMap are continuously enhanced; experimental QWI measures are now included on work area profile reports. Experimental data should be used with caution.

[Click here](#) for a guide explaining how to use this tool.

Monitor settings at high resolution allow the application to show a greater mapped area. OnTheMap is best viewed at a screen resolution of 1024 x 768 or higher.

Done

Proposed Local Employment Dynamics home page for Illinois. Screen resolution is set high (1024 x 768), to enable viewing the complete page without need for scrolling.

Industry Focus contains a citation, but it does not recognize states' involvement. The same citation proposed for QWI Online is also proposed for Industry Focus. Illinois plans implementation of the skinned version of Industry Focus in 2009Q1.

Local Employment Dynamics

## Local Employment Dynamics

### U.S. Census Bureau *LED OnTheMap*

**OnTheMap Version 3** provides detailed maps showing where workers are employed and where they live with companion reports on age, earnings, industry distribution, and local workforce indicators. A total of 45 states are currently featured showing data for five years (2002 through 2006). Click on one of the "Information/Help" links to the right of the map for more information on using the application.

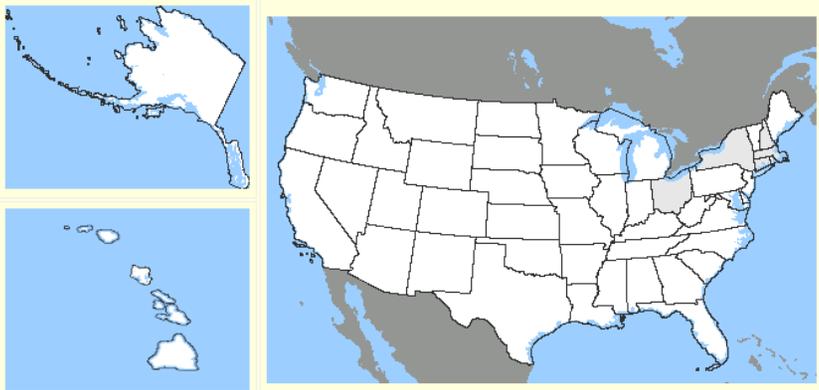

**Database maintenance is being performed. 2005 data will be unavailable during this period.**

**Getting Started - Select a Geographic Area** - Enter a geographic area (state, county, zip code, congressional district, metro area, city name, etc.) into the place name lookup box below. Then click the *Enter* button.

Place Name:

Map or Text-Only:

**Getting Started - Click in the Map** - Start by clicking at the center of the geographical area for your analysis. The application will open a regional map centered on the selected point.

*Excellent citation for the application*

Counties

Lakes and Rivers

The map displays the Chicago metropolitan area with various employment density zones. A primary selection area is highlighted in pink, covering parts of Cook County and DuPage County. The map includes major highways (I-90, I-55, I-290, I-94) and city names such as Schaumburg, Palatine, Arlington Heights, Mount Prospect, Des Plaines, Skokie, and Evanston. A cluster of worker count symbols is visible in the Evanston/Skokie area.
